

Professional Summary

Versatile **Full Stack Engineer** with **1 year 10 months** of professional experience building scalable web and mobile applications across **Node.js, Angular, Next.js, Flutter**, and **PHP (Laravel)**. Proficient in database schema architecture and migrations using **PostgreSQL & MySQL** with **Prisma ORM** and **Eloquent ORM**. Hands-on in containerized workflows using **Docker**, automated builds with **Jenkins CI/CD**, and self-hosted cloud deployments with **Coolify panel** on **Ubuntu VPS (SSH)**. Adept at styling responsive UI with **Tailwind CSS** and leveraging AI tools (Copilot, Claude) for high-velocity sprint delivery.

<> Skills Summary

LANGUAGES

TypeScript, JavaScript (Node.js, ES6+), PHP, SQL, HTML5, CSS3, Python (Basics)

BACKEND & ORM

Node.js, Express.js, Laravel, Prisma ORM, Eloquent ORM, REST APIs, JWT Auth

DEVOPS & LINUX

Docker (Containers), Jenkins (CI/CD), Ubuntu Linux, VPS (SSH), Coolify Panel, Git

FRONTEND & MOBILE

Angular, Next.js, React.js, Flutter (APK), Tailwind CSS, Bootstrap

DATABASES & SCHEMAS

PostgreSQL, MySQL, MongoDB, Supabase, Schema Migrations & Indexing

AI CODING & PRACTICES

GitHub Copilot, Claude, ChatGPT, Antigravity, Sprint Planning, Agile/Scrum

INFRASTRUCTURE, INTEGRATIONS & AUTOMATION

Docker Management | Jenkins CI/CD | Coolify PaaS | Ubuntu VPS SSH | Payments: PayPal, Razorpay, CCAvenue | Automations: n8n, Webhooks

Education

Master of Computer Applications (MCA)

Mohammed Sathak Engineering College, Chennai

2022 – 2024

Professional Experience

MERN Stack Developer Trainee — Pumo Technovation

Sep 2024 – Apr 2025

- Intensive MERN training — built secure auth systems and real-time dashboards with Node/React.
- Developed RESTful APIs focusing on scalable architecture and database performance.

Junior Web Developer — Sri Hema InfoTech

Dec 2024 – April 2026

- Engineered 8+ production applications using **Laravel** and **Core PHP** with mobile-first designs.
- Architected secure RESTful APIs and integrated payment systems (**PayPal**, **Razorpay**, **CCAvenue**).
- Automated business workflows for UK car booking services using advanced admin dashboards.
- Spearheaded **SEO strategies** achieving significant organic growth through technical audits.

Software Developer (Freelance) — Craftsmen Digital Solutions

Nov 2025 – Present

- Contributing to the development of the **WinDriving School Australia** web application.

Full Stack Developer — ABN Consultancy Service

May 2026 – Present

- Developing and maintaining **HRMS - ClassWall Product** using **Docker**, **Jenkins CI/CD**, and **MySQL**.
- Engineering **Native Cow Bell** mobile APK with **Flutter** and backend APIs using **Next.js**, **Prisma ORM**, and **PostgreSQL** with **Jenkins CI/CD**.
- Managing cloud deployments on self-hosted **Ubuntu VPS via SSH** using **Coolify panel** and developing products for **Zazutech.in**.

Real Time Projects

HRMS - ClassWall Product

ONGOING

MAY 2026 – PRESENT

Comprehensive HRMS enterprise solution engineered with **MySQL** database. Managed containerized local & staging environments using **Docker** and automated builds with **Jenkins CI/CD**.

Native Cow Bell (APK & API)

ONGOING

FEB 2026 – PRESENT

Cross-platform mobile APK built in **Flutter** paired with a high-performance backend API built using **Next.js**, **Prisma ORM**, and **PostgreSQL** with **Jenkins CI/CD**.

UK Based Taxi Websites

JAN 2026 – APRIL 2026

Engineered performance optimization suite and high-load admin dashboards for UK platforms.

Real Time Projects (Cont.)

EatNow Restaurant App

DEC 2025 – FEB 2026

MERN stack reservation system with **Firebase** real-time notifications and merchant dashboard.

KalviERP Platform

AUG 2025 – OCT 2025

ERP system for education. Manages student lifecycle and automated fee processing.

Kettimelam Matrimony

JAN 2025 – MAR 2025

Laravel matrimony platform built with **Eloquent ORM** and **MySQL**, featuring an **advanced business development dashboard** and matchmaking.

GoRide Taxi Dispatch

JUL 2024 – SEP 2024

Advanced dispatch system with custom CRM, tracking, and multi-currency payment gateways.

Career Timeline

COMPANY	DURATION	PERIOD
Pumo Technovation	6 months 20 days	Sep 2024 – Apr 2025
Sri Hema InfoTech	1 Year 4 Months 8 days	Dec 2024 – April 2026
Craftsmen Digital Solutions	9 months (Ongoing)	Nov 2025 – Present
ABN Consultancy Service	3 months (Ongoing)	May 2026 – Present
Total Experience	1 Year 10 Months	Sep 2024 – Present

Achievements

MERN STACK:

Certified by Pumo Technovation (Apr 2025).

BEST PERFORMANCE:

Awarded by Kettimelam Matrimony.

DIGITAL PRESENCE:

Recognized for professional branding.

Open Source, Git Repositories & Products

npx create-mern-pro

NPM PUBLISHED | CLI TOOL

Developed a CLI boilerplate generator for MERN stack with **In-built MVC architecture**. Enables rapid development with automated CLI commands.

ONGOING

Agri-Ai-System (Real-time)

Mini-project exploring the use of 3rd-party prediction APIs for intelligent agriculture management and data insights.

OCR Free API

Mini-project implementing Optical Character Recognition by integrating 3rd-party APIs to extract text from images.

Spotify Clone App

Mini-project focused on music streaming UI and 3rd-party audio API integration for play/pause functionality.

AI Chatbot & Research Tool

Mini-project manually integrated using **Python** for automated research. Fetches real-time Wikipedia & DuckDuckGo results.

Booking Event System (Real-time)

PHP-based appointment system integrated with **Google Calendar API** and **Stripe** for real-time scheduling.

Finance Track Dashboard

Personal finance tracking tool focusing on expense visualization and budget management modules.

Next.js CRUD App

Modern web application built with **Next.js** and **Prisma ORM** to demonstrate server-side rendering and modular CRUD operations.

Declaration

Information provided is true to the best of my knowledge. Committed to quality web solutions.
